

## Adobe Photoshop

### In a nutshell

This college certificate is aimed at people who want to learn to use Adobe Photoshop and its many manipulation functions.

### This course is for...

You could be an amateur photographer looking to improve your digital manipulation skills, or you might be looking to enhance your CV.

### Course content

Photoshop skills are increasingly useful in a variety of different job roles and this course will leave you with the ability to edit and manipulate photographs effectively at home or in the workplace.

## COURSE INFORMATION LEAFLET

You don't need any prior knowledge of Adobe Photoshop as this course starts at the very beginning. By the end of the course you will have a good knowledge of Photoshop techniques and processes.

Each ninety-minute session will introduce a variety of Photoshop features and the techniques to use them. There will then be a classroom task using this technique to produce a practical outcome with individual tutor support.

All images will be supplied for classroom use but you will be actively encouraged to bring in your own images too. It is recommended that you bring a USB stick or portable hard drive to save your finished images to take away.

This course will include

- Introduction to Adobe Photoshop
- Basic Corrections
- Black and white processing
- Exploring filters and history
- Cropping and resizing
- Selections
- Retouching Images
- Sharpening images
- Working with Layers and masks
- Text

You will be expected to have a basic knowledge of computers to enrol on this course. An enthusiastic interest in digital photography is essential.

### Entry Requirements

There are no formal entry requirements to enrol on this course.
