

CompTIA Advanced Security Practitioner (CASP+) (CAS-004)

In a nutshell

CompTIA is the world's largest vendor-neutral IT certification body. The CompTIA Advanced Security Practitioner (CASP+) qualification is a stand-alone qualification that validates advanced-level IT security skills and knowledge for advanced Practitioner of cybersecurity.

CASP+ certifies critical thinking and judgement across a broad spectrum of security disciplines and allows IT security professionals to conceptualise, design, and engineer secure solutions across complex enterprise environments.

The CompTIA Advanced Security Practitioner (CASP+) qualification will add authentication to your skills as you help to meet the growing demand for advanced IT security professionals.

This course is available as part of a Personal Learning Account (PLA). PLA is an initiative from the Welsh Government which offers people the chance to access free, part-time courses with flexible and convenient learning that fits around their existing lifestyle (subject to eligibility).

This course is for...

COURSE INFORMATION LEAFLET

... anyone aged 19+, living in Wales and in employment. The usual salary limit of £30,596 does not apply to this course.

... those looking to add to their skills as they help to meet the growing demand for advanced IT security professionals

Course content

The course includes:

- The History of Cryptography
- Cryptographic Services
- Symmetric Encryption
- Asymmetric Encryption
- Hybrid Encryption
- Hashing
- Digital Signatures
- Public Key Infrastructure
- Implementation of Cryptographic Solutions
- Cryptographic Attacks
- Advanced Network Design
- TCP/IP
- Secure Communication Solutions
- Secure Facility Solutions and Network Infrastructure Design
- Enterprise Security
- Cloud Computing
- Virtualization
- Virtual LANs
- Virtual Networking and Security Components
- Enterprise Storage
- Firewalls and Network Access Control Lists
- Trusted Operating System
- Endpoint Security Software
- Anti-malware
- Host Hardening
- Asset Management
- Data Exfiltration
- Intrusion Detection and Prevention
- Network Management, Monitoring, and Security Tools
- Application Security Testing

Specific Application Issues

Application Sandboxing and Application Security Framework

Secure Coding Standards

Application Exploits

Cookie Storage and Transmission

Malware Sandboxing

Process Handling at the Client and Server

Security Assessments and Penetration Testing

Risk Terminology

Identifying Vulnerabilities

Operational Risks

The Risk Assessment Process

A High-Level View of Documentation

Business Documents Used to Support Security

Documents and Controls Used for Sensitive Information

Auditing Requirements and Frequency

The Incident Response Framework

Incident and Emergency Response

Apply Research Methods to Determine Industry Trends and Impact to the Enterprise

Analyze Scenarios to Secure the Enterprise

Integrate Enterprise Disciplines to Achieve Secure Solutions

Integrate Hosts, Storage, Networks, and Applications into a Secure Enterprise Architect

Selecting the Appropriate Control to Secure Communications and Collaboration Solutions

Integrate Advanced Authentication and Authorization Technologies to Support Enterprise Objectives

Implement Security Activities across the Technology Life Cycle

Entry Requirements

The CASP+ qualification is recommended for you if you are an IT professional with at least five years hands-on experience in technical security and/or ten years overall experience in IT administration.

Additional information

This course is delivered by virtual classroom. Virtual classrooms are equivalent to face-to-face classroom courses, but delivered in an online environment.

COURSE INFORMATION LEAFLET

You will need to put aside 5 days to attend this course.

The course includes exams which are invigilated online and you need to have access to an internet enabled device with a microphone and a webcam.
