

City & Guilds Foundation in Electrical Installation (CORE) Level 2

In a nutshell

If you work or want to work in construction, this is an ideal opportunity to further develop your skills and knowledge in electrical installations.

This course is for...

...anyone interested in a career as an electrical installer in domestic dwellings.

Course content

You'll need to have the desire to work in construction, be fully committed to attending as well as respecting others and be self-motivated. You'll also need to be prepared to continue your studies and coursework during your own time.

COURSE INFORMATION LEAFLET

The course itself covers:

- Health and safety in building services engineering
- Principles of electrical science
- Electrical installations technology
- Installation of wiring systems and enclosures
- Understand how to communicate with others within building services engineering

You will be continually assessed through practical projects, written and online tests, before being awarded the Diploma Level 2 Electrical Installations certificate.

Entry Requirements

To enrol on this course you'll need industrial experience and to pass an interview.

Additional information

This course could lead on to Level 3 Diploma Electrical Installations, an Apprenticeship or employment.

You need to have a desire to work in the construction industry. Full commitment to attendance is required. Respect for others, enthusiasm for the subject and self-motivation are the essential qualities we expect to see in all our learners.
