COURSE INFORMATION LEAFLET

the opportunity to pick up some core skills and knowledge, along with the opportunity to move onto our Level 2 Progression in Electrical. The qualification enables learners to begin to develop their:

Knowledge, skills and understanding required in planning, performing and evaluating common practical tasks in electrical and plumbing installations

Understanding of the buildings and structures that constitute the built environment and how they change, and have changed, over time;

Understanding of the trades, roles and careers in the construction and built environment sector;

Understanding of the life cycle of buildings and structures in the built environment and the associated principles and processes at each stage;

Understanding of social, economic and environmental sustainability as appropriate to construction and the built environment;

Knowledge of emerging technologies in the construction and built environment sector;

Employability skills and their understanding of how these are relevant to, and important in, the workplace in the construction and built environment sector;

Knowledge of and ability to apply the principles of working in ways which protect health, safety, well-being and the environment;

The course is delivered by both practical sessions with excellent workshop facilities and theory lessons to underpin the knowledge learnt in the practical sessions. You'll be assessed through practical projects, written and online tests.

Entry Requirements

A minimum of 4 GCSEs grade D or above to include Maths/Numeracy and English/Welsh First Language or a level 1 Construction Skills Qualification and GCSE Maths and English/Welsh 1st language at grade D or above.
